

Environmental Education Volunteer Internship

USFWS: Kodiak National Wildlife Refuge, Alaska Region

Spend the summer outside, learn about the environment of Kodiak, Alaska and share your love for nature with children as an instructor for the annual Kodiak Refuge Science and Salmon Camp. This year we are celebrating the 20th anniversary of this popular program. This internship position will be part of a three-person team to facilitate and lead field trips, lessons, games, hikes, tide-pool excursions, art and song and to provide an adventurous and creative week of hands-on learning for campers in this non-residential day camp. Interns will work directly under a FWS Camp Director and Environmental Education Coordinator and will utilize and enhance existing curriculum on the 2016 theme: Natural Cycles of the Earth.

Dates and Duration

16 week volunteer environmental education internship (travel, housing, and food stipend provided)

Start: May 9th (for training) – arrive day prior preferred.

End: August 26th (some flexibility on end date).

Schedule

Typically: Monday – Friday, 40 hours per week. If weekend work arises, interns will be given time off during the week.

What we provide

- Roundtrip flight to and from Kodiak Island from locations within the U.S.
- Interns will be provided shared housing at no charge.
- Food Stipend: up to \$150 per week for reimbursement of food costs
- Vehicle transportation: The three-person Salmon Camp crew will have access to two vehicles to share and utilize for work, orientation to the island and food shopping.
- Training: The FWS will provide two weeks of training on a variety of topics including: Bear safety and awareness; flora and fauna of Kodiak; environmental education techniques; Pacific salmon; aviation safety including emergency water egress (required for travel by float plane); CPR, First Aid and more. In addition to training, interns will have two weeks of preparation before camp begins.
- If desired, interns will be provided with a seasonal fishing license to practice fishing techniques outside of camp (we do take children fishing as a small portion of camp).
- School internship and/or course credit upon request: We can work with your university degree programs.
- Recreational opportunities include: Hiking, camping, fishing, scenic bike rides, wildflower walks, birding and much more. Some bikes, fishing supplies and camping gear are available for loan to interns.

Requirements

- US Citizen, at least 18 years of age
- Ability to undergo a background check
- Valid Driver's License
- Interest in working with youth
- Interest in spending time outside in rain or shine
- Available for seasonal training beginning May 9th (preferably arriving May 8th) and for all sessions of camp. End date of August 26th has *some* flexibility.

Desired background: Degree-seeking students *and/or* recent graduates in the fields of Environmental Studies, Environmental Education, Biology, Wildlife Conservation, Outdoor Recreation and similar fields *and/or* experience with or interest in youth science camps, summer camps, educating youth, scouts, or other related work.

To APPLY: Applications due: January 10th, 2016.

To be considered, please read and follow specific instructions below:

1. Send **all requested information as one document** to Michelle_Lawson@fws.gov.
2. In your email, use the Subject: **Salmon Camp Internship**

Include:

- A cover letter stating reason for your interest and any qualifications specific to the position.
- Current resume
- One letter of recommendation that includes contact information (from a person with knowledge of your scholastic, employment, club, team or volunteer achievements).
- Contact information for two *additional* references (scholastic, employment, club, sport or volunteer oriented). *For references, please include:*
 - ✓ Their name, job title and place of work
 - ✓ Their email address and phone number
 - ✓ Their relationship (coach, instructor, ...) to you and how long you have known them

Reminder: Create one document that includes all of the above information to attach in your email and use the subject line listed above. Failure to do so may result in your application not being reviewed.

BACKGROUND

What is Salmon Camp?

The mission of Salmon Camp is to educate youth about the natural and cultural systems that define Kodiak's geography and empower learners to investigate their own connections to this special place through hands-on learning, self-reflection and group discovery.

Location

Kodiak Island is the second largest island in the United States. While the Kodiak National Wildlife Refuge encompasses nearly two million acres of the island, the refuge itself is not accessible by road. Salmon Camp is located on the road system just outside the city limits of Kodiak.

Please note

This is a full-time, summer-long environmental education internship. If you're looking to spend a summer season on a beautiful Alaskan island dedicated to providing engaging science education to interested young learners, then by all means apply!
